

# neverbin wastetracker®

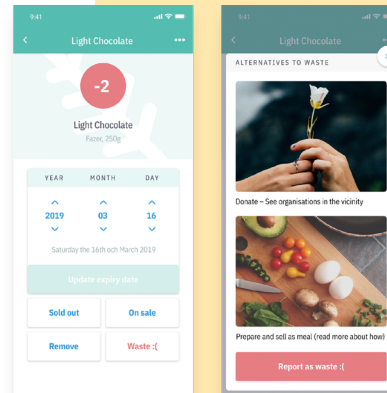

Automate date control in your store - reduce waste and increase revenue from the first month and get full control of article expiration dates in your store.

**1** WasteTracker® lists articles that needs to be controlled today.

**2**

Check each article in the list by looking at the nearest best-before date.

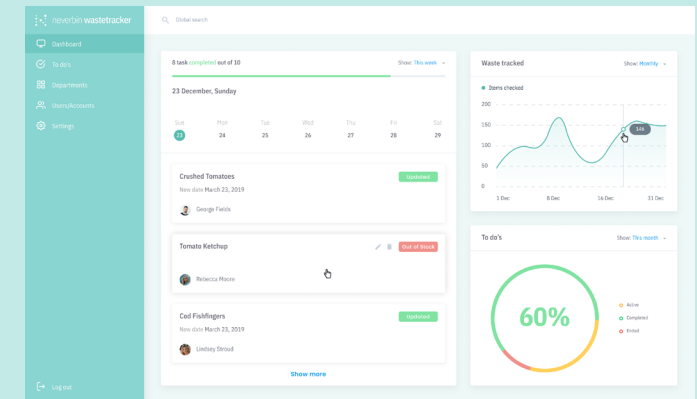

**3**

If the article is sold, add the new best-before-date. If it's still available, WasteTracker® helps you with options to save it from becoming waste.

## Installation in your store is easy

- 1** Decide departments in your store that you want to control with WasteTracker®.
- 2** Select department and scan the EAN-code for the article you want to control. Finish the scan by adding the closes expiration date.
- 3** WasteTracker® helps you suggest the number of days before the expiration date that the article should be controlled.

## WasteTracker® Dashboard

- 👉 Get reports and statistics of daily waste in your store.
- 👉 Find trends and predict future needs.
- 👉 Track articles that often are subject to waste.
